What is A1Office

At A1Office, our vision is it to **simplify how users interact with the Documents** by offering our users free viewing & editing capabilities for all existing and new document formats across different platforms. Currently, a lot of these formats perform really well on Desktop, but the mobile experience is not that great on most of the apps. Our target is to constantly evolve our experience with a mobile first approach by analysing usage patterns from millions of users acquired till date.

Problem statement

1. Current document viewing (& editing) experience is great on larger screens, but with screens getting smaller there is a need of an app which performs equally well on mobile devices as well.

2. There is no single platform which is allowing both conversion *(using tools)* and editing of documents in one place.

3. There is a need of a local player that understands the needs of local customer better

Thank you.
